

# P ZERO™

CAR — SUV — SUMMER — SPORTY

A milestone in the development of the Pirelli range, P ZERO™ has been chosen as original equipment for the most performance oriented and powerful car models on the market.

Its asymmetric tread pattern improves braking performance and enhances handling and control. Excellent in wet conditions with improved safety in potential aquaplaning situations.

Its new nano-composite compound ensures maximum grip and stability. The structural integrity of the tyre improves steering response, which is essential in sports driving, and also ensures uniform tread wear. The special “s-shaped” grooves in the tread area deliver lower cabin noise levels, enhancing driver’s comfort.

### **THREE WIDE LONGITUDINAL GROOVES**

Faster water expulsion for an improved safety and control in potential aquaplaning situations

### **S-SHAPE TREAD DESIGN**

Optimal pressure distribution for safety under critical braking conditions, on straight and through corners

### **THREE SOLID CENTRAL RIBS**

Improved braking and traction also at high speed thanks to an increased pattern stiffness with optimised and constant area
